

Three Nozzle Spray Boom D 4

Note the following -

- 1) Plastic pipes and fittings can vary between 20 and 21mm.
- 2) You should check that components are a good fit before buying
- 3) Buy the best quality available if there is a choice
- 4) Buy valve sockets with thick walls to prevent leaks
- 5) 1/2" tap washer cut to size fits inside the cap. The hole is made with a hot nail
- 6) Drill/file hole in GI cap to accept nozzle
- 7) Some valve sockets are tapered at ends and may leak.
- 8) Cut off some threads to get a tight fitting seal

List of components required

1/2" Tee pvc 2 1/2" Elbow 2
 1/2" valve socket 4 1/2" GI cap 3
 Nozzles 3 Tap washers 3 1/2 pipe pvc 40mm 1
 1/2" pvc 40 mm 1 260mm 1 220 mm 1
 45 mm 1 80 mm 1

Dimensions of all components shown before assembly into sockets
